I want to express my feeling about the way XM has changed my life. Yes I said changed my life. Let me say from the outset I am not one of those people whose life is easily changed by technology...I'm a 27 year old college graduate working as a marketing consultant for a very large corporation. I spend 95% of my week on the road visiting clients. As you can imagine...I depend on the radio to be my road companion and source of constant information. Until XM came along I had to attempt to find my beloved music and talk format stations while in the "culturally diverse" areas of West Virginia, Western Ohio and Eastern Ohio. I am completely hooked on XM and glad that it is offered in so many vehicles...that I have purchased 3 Portable units for myself and friends and family. This service is great - it makes me proud to be an American that we developed the technology and were first to offer it in cars...like GM vehicles. DON'T DRAG DOWN OUR FREEDOM TO CHOOSE OUR RADIO STATIONS. This competition will help the entire industry improve...not accept mediocre offerings. Thanks.
